

# Federal Communications Commission

# § 101.101

## § 101.99 Reimbursement of relocation expenses in the 2115–2150 MHz and 2165–2200 MHz bands.

(a) Whenever an ET licensee (including Mobile-Satellite Service licensees) in the 2115–2150 MHz or 2165–2200 MHz bands relocates an incumbent paired microwave link with one path in the 2115–2150 MHz band, and the paired path in the 2165–2200 MHz band, the ET licensee is entitled to reimbursement of 50% of its relocation costs from any subsequently entering ET licensee which would have been required to relocate the same fixed microwave link.

(b) The subsequently entering ET licensee must reimburse the relocating ET licensee before the subsequently en-

tering licensee may begin operations in these bands, unless the subsequently entering ET licensee can demonstrate that, according to established interference criteria, it would not have interfered with the microwave link in question.

(c) The total costs of which 50% is to be reimbursed will not exceed \$250,000 per paired fixed microwave link relocated, nor \$150,000 if a new or modified tower is required.

BAS: Broadcast Auxiliary Service—(Part 74)  
CARS: Cable Television Relay Service —(Part 78)  
CC: Common Carrier Fixed Point-to-Point Microwave Service—(Part 101, Subparts C & I)  
DBS: Direct Broadcast Satellite—(Part 100)  
DEMS: Digital Electronic Message Service—(Part 101, Subpart G)  
ISM: Industrial, Scientific & Medical—(Part 18)  
ITFS: Instructional Television Fixed Service—(Part 74)

LTTS: Local Television Transmission Service—(Part 101, Subpart J)  
 MAS: Multiple Address System—(Part 101)  
 MDS: Multipoint Distribution Service—(Part 21)  
 OFS: Private Operational Fixed Point-to-Point Microwave Service—(Part 101, Subparts C & H)  
 PCS: Personal Communications Service—(Part 24)  
 PET: Emerging Technologies (per ET Dkt. No. 92–9, not yet assigned)  
 PRS: Paging and Radiotelephone Service—(Part 22, Subpart E)  
 SAT: Fixed Satellite Service—(Part 25)

Notes:

F—Fixed

M—Mobile

TF—Temporary Fixed

(1)—Applications for frequencies in the 932.5–935/941.5–944 MHz bands may be filed initially during a one-week period to be announced by public notice. After these applications have been processed, the Commission will announce by public notice a filing date for remaining frequencies. From this filing date forward, applications will be processed on a daily first-come, first-served basis.

[61 FR 26677, May 28, 1996, as amended at 62 FR 23165, Apr. 29, 1997; 62 FR 24582, May 6, 1997; 65 FR 38327, June 20, 2000; 65 FR 54175, Sept. 7, 2000]

EFFECTIVE DATE NOTE: At 65 FR 54175, Sept. 7, 2000, § 101.101 was amended by removing the entry for 17,700–18,590 Mhz band, and by adding entries for 17,700–18,300 and 18,300–18,580, effective Oct. 10, 2000.

**§ 101.103 Frequency coordination procedures.**

(a) Assignment of frequencies will be made only in such a manner as to facilitate the rendition of communication service on an interference-free basis in each service area. Unless otherwise indicated, each frequency available for use by stations in these services will be assigned exclusively to a single applicant in any service area. All applicants for, and licensees of, stations in these services must cooperate in the selection and use of the frequencies assigned in order to minimize interference and thereby obtain the most effective use of the authorized facilities. In the event harmful interference occurs or appears likely to occur between two or more radio systems and such interference cannot be resolved between the licensees thereof, the Commission may specify a time sharing arrangement for the stations involved or may, after notice and opportunity for hearing, require the licensees to make such changes in operating techniques or equipment as it may deem necessary to avoid such interference.

(b)(1) Operations in the bands 31,000–31,075 MHz and 31,225–31,300 MHz licensed prior to March 11, 1997, were licensed on an unprotected basis and are subject to harmful interference from similarly licensed operations in that band.

(i) Operations licensed in the Local Multipoint Distribution Service and those operations licensed prior to

March 11, 1997, except in the Local Television Transmission Service, operating in these bands are equally protected against harmful interference from each other.

(ii) In the case of operations licensed prior to March 11, 1997, except in the Local Television Transmission Service, that are licensed on a point-to-radius basis, LMDS licensees shall be subject to the protection requirement established in this section in the case of existing links operated by such licensees, and in the case of links added by such licensees in the future in accordance with the terms of their point-to-radius licenses.

(iii) An LMDS licensee may not initiate operations within the point-to-radius area licensed to an operator (other than an operator in the Local Television Transmission Service) prior to March 11, 1997, even if such operator has not initiated operations to the fullest extent of the license. An LMDS licensee, however, may initiate operations at the border of such operator's license area without prior coordination if the LMDS licensee's operations would not cause harmful interference to the other operator's existing operations.

(iv) An operator (other than an operator in the Local Television Transmission Service) licensed on a point-to-radius basis prior to March 11, 1997, may add additional stations within its license area. Such operator shall coordinate with any affected LMDS licensee if its new operations might
